

Irish Cob Stallion Studbook Inspections Procedures and Guidelines

Applications

Application forms for Cob inspections are available from the HSI website and office. Applications for inspection must contain the following:

- Completed and signed application form and accompanying documentation if necessary;
- Relevant Inspection Fee (€18).

Incomplete entries will not be accepted.

Following the receipt of completed applications HSI will contact Cob Stallion owners with the details of the inspection and a schedule of events.

Check In

All owners must report to a HSI representative upon arrival at the centre in order to check in.

The entry numbers provided by HSI must be used at all times during the inspection.

Entrants must ensure they reach the inspection site in plenty of time in order to check in their stallion(s).

Please note stallions that have not been checked in cannot be presented at the inspection

Presentation

All stallions are expected to be presented at show standard and must be sufficiently trained and fit to take part in all aspects of the inspection. The stallion should be in good condition, be well groomed and have well maintained hooves.

Each stallion must be presented in a correctly fitted bridle.

Handlers are required to dress neatly. Comfortable footwear must be worn in order to present the animal correctly. In the case where an owner has more than one horse on the premises, sufficient handlers must be on site to cater for each animal. All handlers must be dressed appropriately.

Irish Cob stallions must be a minimum of 2 years of age to be presented for inspection.

The inspection panel consists of two inspectors.

The inspection will take place over one day and will include the following elements:

1. Veterinary Examination
2. Conformation and Breed Type Assessment
3. Gait Assessment

1. Veterinary Examination

On arrival to the veterinary examination the identification of the stallion will be checked by comparing the stallion's markings to the markings on its passport. The stallion will also be scanned to confirm its microchip number.

At the inspection stallions will undergo a veterinary examination by Veterinary Surgeons appointed by Horse Sport Ireland. The examination will consist of the following:

Preliminary examination:

This includes height & bone measurement of all stallions. The Preliminary Examination involves overall visual and palpable observations of the animal presented. The heart and lungs are auscultated at rest.

Horse Sport Ireland will take DNA sample from all stallions presented for inspection. This DNA sample will be stored by the Approved Laboratory (Weatherbys Ireland) and will be used to verify the parentage of future progeny registered in the Irish Cob Studbook.

The measurements taken at the veterinary examination will be considered to be the official measurements of the stallion for classification and studbook purposes.

Horse Sport Ireland reserve the right to take a blood sample from stallions presented for inspection in order to test the presence of disease (e.g. CEM, EVA, EIA) and prohibited substances.

2. Conformation & Breed Type Assessment

Handlers must present stallions to the inspectors in the arena for their conformation and breed type assessment. Stallions must be able to stand correctly and quietly in order for the inspectors to make their assessment. No boots or leg wraps of any description are permitted at this stage of inspection.

Stallions will be assessed on their 'breed type' (i.e. how closely they adhere to the breed standard outlines in the Irish Cob Studbook Rules.

Irish Cob Stallion Studbook Inspections Procedures and Guidelines

3. Gait Assessment in the Arena

When requested the handler will move the stallion in walk and then in trot.

The handler must always lead from the left side of the horse. Overuse of the whip is not permitted; the animal should be trained to show correctly.

Horse Sport Ireland reserves the right to terminate any inspection for health and safety reasons.

Science and Veterinary Medicine, University College Dublin Hospital or by a veterinary practice nominated by HSI, in respect of each examination shall be final.

4. Classification Following Irish Cob Studbook Inspections

- Stallions that qualify for classification in the Main Elite Stallion Class following inspection will have their passports updated to reflect their classification in the Main Elite Stallion Class. Stallions that do not qualify for classification in the Main Elite Stallion Class following inspection will retain their original classification in the Irish Cob Studbook.
- Males that meet the inspection requirements for the Supplementary Elite Stallion Class will have their passports updated to reflect their classification in the Supplementary Elite Stallion Class.
- Stallions that do not qualify for classification in the Main Elite Stallion Class or the Supplementary Elite Stallion Class following inspection will retain their original classification in the Irish Cob Studbook.
- Stallions that are inspected under the Irish Cob Studbook Cross Breeding Programme that meet the inspection requirements will be classified in the Main Basic Register. Stallions that do not meet the inspection requirements for the Cross Breeding Programmes will not be classified in the Irish Cob Studbook.

5. Appeals Procedure

The owners of animals that do not meet the inspection requirements will be given the opportunity to re-present the animal again at the next available inspection date.

Owners of stallions that do not meet the clinical veterinary requirements may appeal the findings of the veterinary examination. The conditions of the appeal are as follows:
The owner of the horse must apply to HSI to have the horse re-examined within one month of the original examination;

- The owner shall arrange at their own expense to have the stallion examined by the School of Agriculture, Food Science and Veterinary Hospital, or by a veterinary practice nominated by HSI.
- The re-examination shall only be carried out in respect of the condition for which the stallion originally failed the clinical veterinary examination and the decision of the School of Agriculture, Food
