IRISH DRAUGHT (ID) HORSE STUDBOOK

CLASSIFICATION OF STALLIONS IN THE ID STUDBOOK

- ◆ **CLASS 1 (C1):** Stallions that meet the veterinary and inspection requirements. Class 1 stallions are eligible for additional merits (Gold, Silver and Bronze) based on their own performance and their progeny's performance in a number of disciplines. Stallions that were previously classified as 'RID' are classified in this class.
- ◆ **RID [GB]:** Stallions that were inspected and classified as 'RID' by the Irish Draught Horse Society Great Britain (IDHS[GB]) from 2001 to 2010. **RID [CAN]:** Stallions that have been classified in the RID class of the Irish Draught Horse Studbook maintained by the Irish Draught Horse Society Canada (IDHSC).
- ◆ **CLASS 2 (C2):** Stallions that meet the veterinary requirements but have not met the inspection requirements. Stallions that were previously classified as Section 1 (S1) are classified in this class.
- ◆ **G2 [GB]:** Stallions that have been classified as 'Grade 2' by the IDHS[GB] between 2004 and 2010.
- ◆ **S1 [CAN]:** Stallions that have been classified as 'S1' by the IDHSC between 2004 and 2012.
- ◆ **CLASS 3 (C3):** Stallions that do **not** meet the veterinary requirements. Stallions that were previously classified as Section 2 (S2) are classified in this class.
- ◆ **UNINSPECTED:** Stallions that have not come forward for a veterinary examination or an inspection of any kind.

NOTE: Stallions previously classified as 'RID' are classified as Approved in the ISH Studbook. Class 2 and Class 1 Irish Draught stallions that have not previously been classified as 'RID' are eligible for classification as Approved in the ISH Studbook providing they meet specified performance criteria.

ID STALLION ASSESSMENT PROCESS

- ◆ **STUDBOOK INSPECTION:** Stallions must be a minimum of 3 years of age to be presented for the Irish Draught Horse Studbook inspections. Stallions undergo a veterinary examination (including X-Rays) and an assessment of their conformation, type, movement and athleticism using linear scoring. Movement is assessed both in hand and loose and athleticism is assessed by means of loose jumping. Older stallions can opt to have their athleticism assessed under saddle. Stallions that meet the veterinary and inspection requirements are classified as 'Class 1'.
- ◆ **OPTIONAL ATHLETICISM ASSESSMENT FOR BRONZE MERIT:** The owners of 'Class 1' stallions aged 4 years and older can opt to have their stallion's athleticism assessed by jumping a course of fences at 1.00m level under saddle. Stallions that achieve the minimum athleticism score are awarded a Bronze merit for their own performance in the discipline of show jumping.

IRISH DRAUGHT HORSE STUDBOOK STALLION MERIT CRITERIA

Stallions that are classified as CLASS 1, RID[GB] and RID[CAN] in the Irish Draught Horse Studbook are eligible to be awarded additional merits (BRONZE, SILVER and GOLD), based on their performance and their progeny's performance in a number of disciplines. The following is the Irish Draught Horse Studbook Stallion Merit Criteria as of the 1st January 2013. Please note that the criteria is subject to future changes.

	Own Performance	Progeny Performance Criteria (minimum)
GOLD	<p>Jumping: A Stallion that achieves 4 double clear rounds at 1.30m level.</p> <p>Dressage: A stallion that achieves 4 scores of above 64% at advanced medium level.</p> <p>Eventing: A stallion that has completed 4 events at CNC** with a clear round SJ and clear jumping XC OR on completion of 2 CNC** events & 1 CIC** with a clear round SJ and clear jumping XC.</p> <p>In hand Showing: A stallion that achieves 1st three times in the stallion class at either the RDS or the ISA All-Ireland Championships.</p>	<p>Jumping: A stallion that produces 3 progeny that each achieve 4 double clear rounds at 1.30m level.</p> <p>Dressage: A stallion that produces 3 progeny that each achieves 4 scores of above 64% at advanced medium level.</p> <p>Eventing: A stallion that produces 3 progeny that each complete 4 events at CNC** with a clear round SJ and clear jumping XC OR on completion of 2 CNC** events and 1 CIC** with a clear round SJ and clear jumping XC.</p> <p>In hand Showing: A stallion that produces 5 distinctive progeny that each achieve 1st in any showing class in the RDS, RUAS or any ISA National Championships.</p> <p>Riding: A stallion that produces 5 distinctive progeny that each achieve 1st in any riding class at the RDS, RUAS or any other ISA National Championships.</p>
SILVER	<p>Jumping: A stallion that achieves 4 double clear rounds at 1.20m level.</p> <p>Dressage: A stallion that achieves 3 scores of above 64% at elementary level.</p> <p>Eventing: A stallion that has completed 3 events at CNC* with a clear round SJ and clear jumping XC OR on completion of one CNC* and one CCI*/CIC* with a clear round SJ and clear jumping XC.</p> <p>In hand Showing: A stallion that achieves 1st twice in the stallion class at either the RDS or the ISA All-Ireland Championships.</p>	<p>Jumping: A stallion that produces 3 progeny that each achieves 2 double clear rounds at 1.20m level.</p> <p>Dressage: A stallion that produces 3 progeny that each achieves 3 scores of above 64% at elementary level.</p> <p>Eventing: A stallion that produces 3 progeny that each have completed 2 events at CNC* with a clear round SJ and clear jumping XC OR on completion of one CNC* and one CCI*/CIC* with a clear round SJ and clear jumping XC.</p> <p>In hand Showing: A stallion that produces 3 progeny that each achieves 1st in any showing class at the RDS, RUAS or any ISA National Championships.</p> <p>Riding: A stallion that achieves 3 progeny that each achieves 1st or 2nd in any riding class at the RDS, RUAS or any ISA National Championships.</p>
BRONZE	<p>Jumping: A stallion that achieves 2 double clear rounds at 1m level OR jumps 1m level under saddle as a four year old or older at the stallion inspections and achieves a score of above 70% TB.</p> <p>Dressage: A stallion that achieves 2 scores of above 64% at preliminary level.</p> <p>Eventing: A stallion that has completed 2 events at Pre Novice level with a clear round SJ and clear jumping XC.</p> <p>In hand Showing: A stallion that achieves 1st in the stallion showing class at either the RDS or the ISA All-Ireland Championships.</p>	<p>Jumping: A stallion that produces 3 progeny that each achieves 2 double clear rounds at 1m level.</p> <p>Dressage: A stallion that produces 3 progeny that each achieves 2 scores of above 64% at preliminary level.</p> <p>Eventing: A stallion that produces 2 progeny that each has completed two events at Pre Novice level with a clear round SJ and clear jumping XC.</p> <p>In hand Showing: A stallion that produces 2 progeny that each achieves 1st in any showing class in the RDS, RUAS or any other ISA National Championships.</p> <p>Riding: A stallion that achieves 2 progeny that each achieves 1st at the RDS, RUAS in any riding class or other ISA National Championships.</p>

PERFORMANCE POINTS IN NATIONAL COMPETITION IN IRELAND.

Performance information at national level for showjumping, eventing and dressage in Ireland for individual stallions and their progeny are included for each stallion where available. Such performance data was supplied by Showjumping Ireland (up to 7 February 2015), Eventing Ireland (up to 4 December 2014) and Dressage Ireland (up to 20 January 2015) and are included in respect of horses registered in the Irish Horse Register.

PERFORMANCE INFORMATION WITH FEI POINTS IN INTERNATIONAL COMPETITION

Each year the WBFSH publishes showjumping, eventing and dressage rankings for horses competing at international level in showjumping, eventing and dressage (see www.wbfs.com).

Included in this publication is the combined number of FEI points for showjumping and eventing, as published in the WBFSH rankings list from 2004 to 2014, for the progeny of individual stallions. Also included is the combined FEI points published on the WBFSH ranking list from 2006 to 2014 for dressage.

NOTE: Every effort has been made to ensure that all the data contained in this publication have been accurately collated. However, since the information has been collated from a number of sources it may be incomplete in some instances.

Horse Sport Ireland shall not be held responsible for any inaccuracies herein.

Horse Sport Ireland shall not be responsible for documenting the performance of horses which are not registered in the Irish Horse Register.

Horse Sport Ireland wishes to acknowledge the co-operation of the World Breeding Federation for Sport Horses (WBFSH), Fédération Equestre Internationale (FEI), Showjumping Ireland, Eventing Ireland and Dressage Ireland.

LINEAR PROFILING

Linear scoring was introduced in 2010 under the new Horse Sport Ireland inspection process for the Irish Sport Horse and Irish Draught Horse Studbooks. Linear scoring is a descriptive method of assessing a horse, describing where a horse lies between the biological extremes for any given trait. For example, the trait 'Stance of Forelegs' describes where a horse lies in relation to the two extremes for that trait, i.e. between obviously 'Back at Knee' and obviously 'Over at Knee'.

Trait		Obvious	Average	Obvious
		a b c	d e f	g h i
Stance of Forelegs	Back at Knee	[] [] []	[] [] []	[] [] []

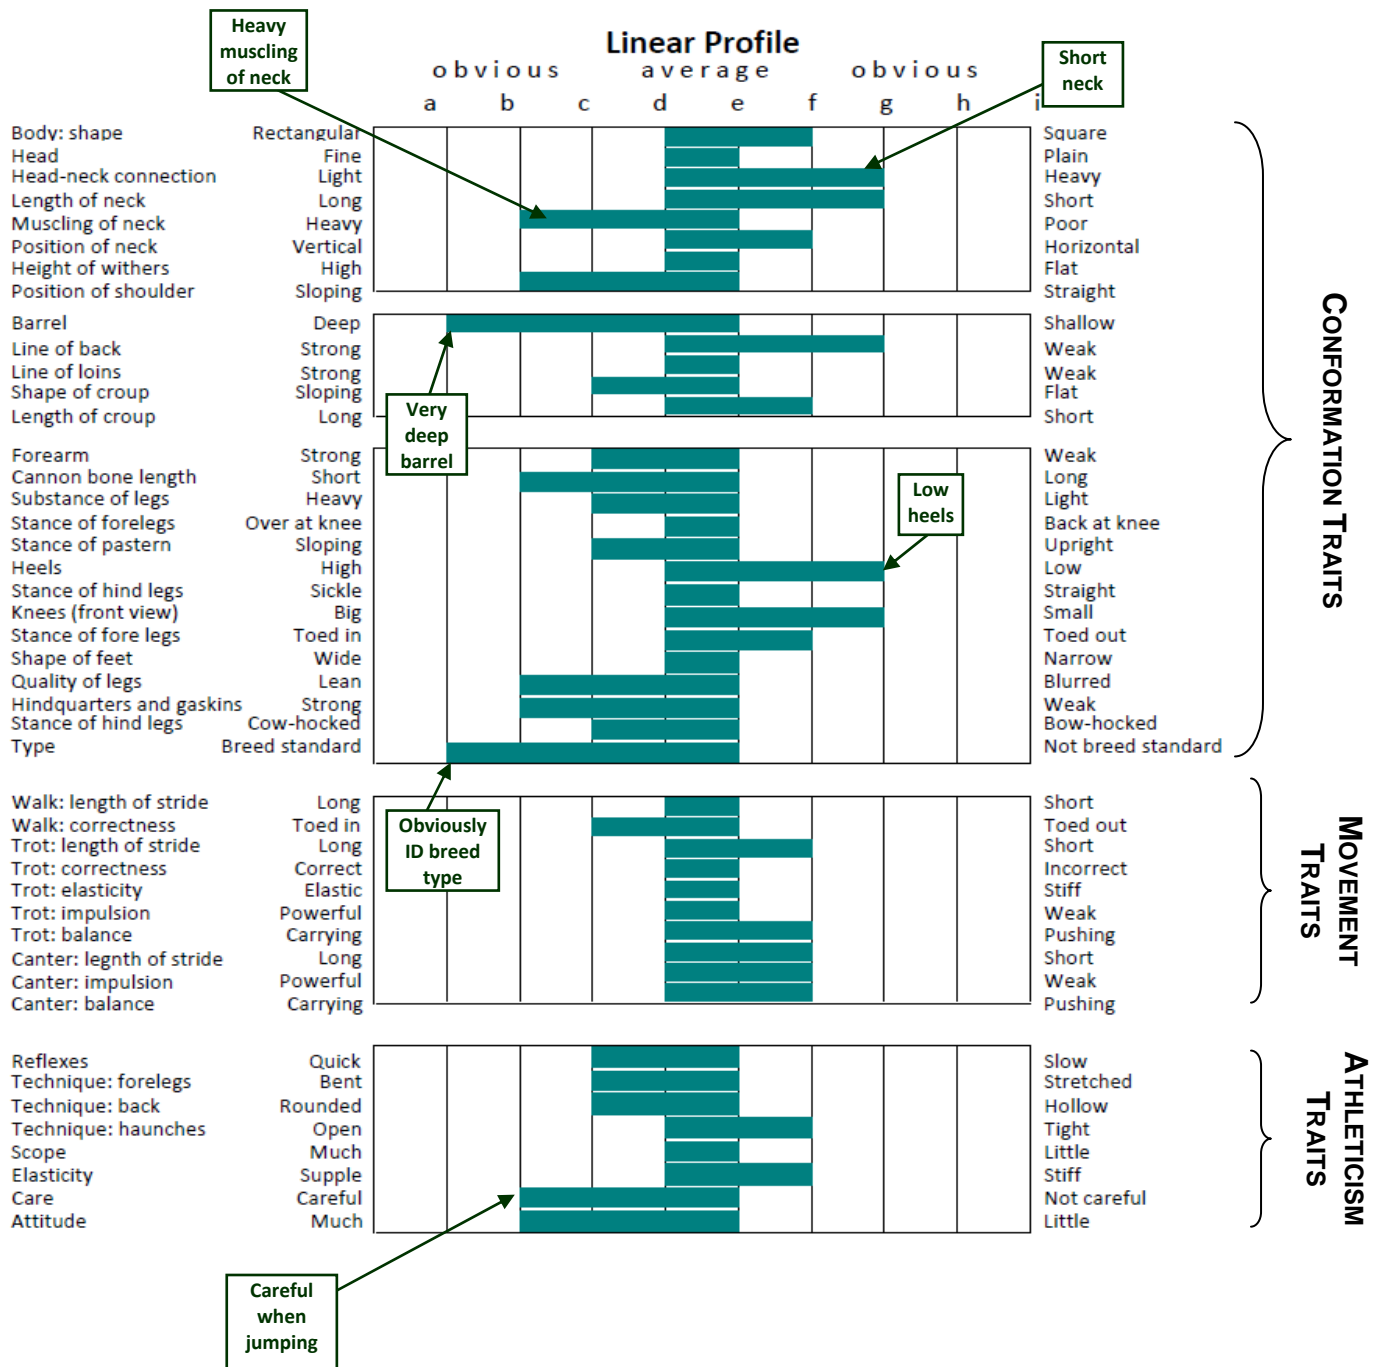

A horse that receives an 'a' for 'Stance of Forelegs' is being described by the inspection panel as being very obviously 'Back at Knee', while a horse that received a score of 'i' is being described as very obviously 'Over at Knee'. A horse that receives a score of 'e' is being described as average for 'Stance of Forelegs' (neither over or back at knee). Linear scoring is strictly about making observations on a horses traits and the average score is not always the most desirable. For example, the trait 'Scope' is assessed when the horse is jumped loose or under saddle. Horses are described in terms of where they lie between having 'Much' or 'Little' Scope. In this case scoring an 'a' for obviously 'Much Scope' is preferable to scoring an 'e' for 'Average Scope'.

Trait		Obvious	Average	Obvious	
		a b c	d e f	g h i	
Scope	Much	[] [] []	[] [] []	[] [] []	Little

There are 45 traits scored for each Irish Draught Horse inspected, including 27 conformation traits, 10 movement traits and 8 athleticism traits. The additional traits scored for Irish Draught Horses bear relevance to the Irish Draught breed type (eg. Cannon Bone Length, Barrel).

In this publication linear profiles are published for all stallions that were classified as CLASS 1, RID-GB and RID-CAN in the Irish Draught Horse Studbook between 2010 and 2014.

Genetic Diversity in the Irish Draught

The long-term survival of the Irish Draught breed requires a breeding policy that includes and balances the dual aims of breed improvement and breed preservation. This policy aims to provide breeders with a wide choice of stallions that meet with breed standards but that may contribute to the breed's development in a variety of ways. These include genetically diverse stallions that will contribute to genetic diversity as well as more popular bloodline stallions whose individual strengths may lie in their traditional breed type or athleticism.

What is genetic diversity?

Genetic diversity refers to the variety of individual genes within a breed. Traditionally, the Irish Draught horse's greatest strength was its versatility. This versatility reflected the variety or diversity of the genes present in the breed.

Breed preservation plans focus mostly on genetic diversity. Genetically diverse bloodlines are in most danger of dying out and are focused on because once lost, they cannot be recovered. However, all bloodlines contribute to genetic diversity, and a broad base provides a versatile foundation for future breeding. Long-term genetic diversity in the breed can be ensured by avoiding the over-use of both rare and popular stallions and bloodlines.

Measurement of genetic diversity is becoming widely used in the conservation of rare breeds. The aim of measuring genetic diversity is to identify rare bloodlines so that they can be preserved, giving the Irish Draught breed the broadest possible base while also preserving its unique and traditional characteristics.

How is genetic diversity calculated?

Genetic diversity of Irish Draught horses in Ireland is calculated by:

- calculating the relationship between a particular horse and every individual Irish Draught mare in the Irish studbook;
- averaging all these figures to give a single percentage figure (called the "mean kinship") for the particular horse.

At present, this includes over 4,500 Irish Draught mares registered in Ireland since 1995. A computer program calculates the relationship between a horse and each of the mares in this population, for example the relationship between parent and offspring is 50%, the relationship between full siblings is 50%, and the relationship between half siblings is 25% TB. All pedigree recorded in IHR is taken into account in the calculation.

The mean kinship for a particular horse measures the degree to which that horse is related to Irish Draught mares in Ireland. The lower the mean kinship between a horse and the mares in Ireland, the rarer is their bloodline. Mean kinships provide a snapshot of the rarity of a horse's bloodlines at a point in time.

The mean kinship for a hypothetical mating can be estimated by breeders by adding the relevant figures for the prospective sire to those for the prospective dam and then dividing by 2.

CapallOir

Mean kinships with Irish Draught horses from Horse Sport Ireland's online CapallOir database, available at www.horsesportireland.ie/breeding. This will enable breeders to see the genetic diversity information for their mares and stallions.

The mean kinship of young horses is exactly the average of the figures for their parents. It may then increase or decrease over time depending on the number of purebred progeny that they breed.

Avoiding Inbreeding

Avoiding inbreeding is also important to maintain genetic diversity in Irish Draught horses. Breeders choosing to include genetic diversity in their mating plans must still check that prospective sire and prospective dams are not closely related even if both are genetically diverse when compared to the breed as a whole. Pedigrees can be easily checked for common ancestors using the new CapallOir database. Breeders may also wish to consider the percentage Thoroughbred of potential stallions, for example some sons of Clover Hill have relatively low mean kinships due to Clover Hill's Thoroughbred sire.

Support for genetic diversity

Research into genetic diversity is supported by the Department of Agriculture, Fisheries and Food through their Conservation of Animal Genetic Resources scheme and has been carried out in collaboration with ICBF and the UCD School of Agriculture, Food Science & Veterinary Medicine.
