IRISH SPORT HORSE (ISH) STUDBOOK

CLASSIFICATION OF STALLIONS IN THE MAIN SECTION OF THE ISH STUDBOOK

- **APPROVED:** Stallions that have met all veterinary and inspection/performance requirements. Approved stallions are eligible for Star Ratings, ranging from 1 to 5 stars, based on their own performance or their progeny's performance in FEI disciplines.

- **RECOGNISED:** Foreign bred performance stallions standing outside of Ireland that are registered in the main section of a studbook that is a full member of the World Breeding Federation for Sport Horses (WBFSH) and have met specified performance/progeny performance criteria and submit a declaration from their originating studbook stating that they have met the veterinary requirements for that studbook.

- **PRELIMINARY APPROVED (PA):** Stallions aged between 4 and 12 years of age that have met the veterinary requirements and the Stage 1 and Stage 2 inspection requirements.

- **PRELIMINARY RECOGNISED:** Foreign bred performance stallions aged between 4 and 12 years old, standing outside of Ireland that are registered in the main section of a studbook that is a full member of the WBFSH and meet specified performance and studbook criteria.

- **NOT APPROVED 1 (NA1):** Stallions that have met the veterinary requirements but have not met, or have not yet met, the inspection (conformation, movement, athleticism) or performance requirements. NA1 stallions can be upgraded to Approved status if they meet specified pedigree and performance criteria. Stallions that were previously classified as Section 1 (S1) are classified in this class.

- **NOT APPROVED 2 (NA2):** Stallions that have **not** met the veterinary requirements. Stallions that were previously classified as Section 2 (S2) are classified in this class.

- **ENTRY (ENT):** Stallions that have not come forward for a veterinary examination or inspection.

ISH STALLION ASSESSMENT PROCESS

- **STAGE 1:** Stallions must be a minimum of 3 years of age to be presented for the Stage 1 inspection. Stallions undergo a veterinary examination (including X-Rays) and an assessment of their conformation, movement and athleticism using linear scoring. Movement is assessed both in hand and loose and athleticism is assessed by means of loose jumping. Older stallions can opt to have their athleticism assessed under saddle.

  Stallions that meet the inspection and veterinary requirements are invited to participate in the Stage 2 inspections.

- **STAGE 2:** Stallions must be a minimum of 4 years of age to be presented for the Stage 2 inspection which is a ridden assessment. Stallions are required to complete a course of up to 8 fences ridden by their own rider and by a test rider appointed by HSI. Each stallion undergoes a further veterinary examination and an assessment of their gaits and athleticism under saddle.

  Stallions that meet the veterinary and inspection requirements in the Stage 2 inspections are classified as 'Preliminary Approved (PA)' and proceed to Stage 3.

- **STAGE 3:** 'Preliminary Approved (PA)' stallions aged between 4 and 12 years of age undergo Stage 3 of the assessment process which involves a review of the stallion's own performance and/or his progeny's performance. This review takes place annually between the ages of 6 and 12 years and stallions that are deemed to have sufficient performance/progeny performance are upgraded to 'Approved'. Stallions with insufficient performance/progeny performance by the age of 12 years can be re-classified as 'Not Approved 1 (NA1)'.

Sport Horse & Thoroughbred stallions that are classified as APPROVED. RECOGNISED or SUPPLEMENTARY APPROVED in the Irish Sport Horse Studbook are eligible to be awarded star ratings, ranging from 1 to 5, based on their performance and their progeny's performance in FEI disciplines. The following is the Irish Sport Horse Studbook Stallion Star Rating Criteria as of the 1st January 2013. Please note that the criteria is subject to future changes.

	Minimum Performances Required for each Rating Level				
Rating Type	**5***	**4***	**3***	**2***	**1***
Stallion performance – Showjumping	2 double clear rounds at CSI/CSIO 5* level in FEI competitions (GP or Nations' Cup class fence height at least 1.50m or equivalent [1,2])	2 double clear rounds at CSI/CSIO 3* or CSI/CSIO 4* level in FEI competitions (GP or Nations' Cup class fence height at least 1.50m or equivalent[2]) or higher	2 double clear rounds at CSI/CSIO 3* level in FEI competitions or 2 double clear rounds in FEI competitions at a fence height of at least 1.45m at CSI/CSIO level or 2 top 4 placings in FEI speed classes[14] at a fence height of at least 1.50m at CSI/CSIO level or higher	2 double clear rounds at CSI/CSIO 2* level in FEI competitions or 2 double clear rounds in FEI competitions at a fence height of at least 1.40m at CSI/CSIO level or 2 top 4 placings in FEI speed classes at a fence height of at least 1.45m at CSI/CSIO level or 2 double clear rounds at National 1.50m level[3] or higher	2 double clear rounds at National 1.40m level or equivalent[4] or higher or 2 top 4 placings in FEI speed classes at a fence height of at least 1.40m at CSI/CSIO level
Stallion performance – Eventing	2 MERs[15] at CCI 4* level[10]	2 MERs[15] at CCI 3* level[11] or higher	2 MERs[15] at CIC/CNC 3* level or higher	2 Top 25% finishes at CCI 2* level[12] or higher	2 Top 10% finishes at CIC/CNC 2* level or higher
Stallion performance-Dressage	2 placings at CDI/CDIO5*level (big tour or equivalent) with a score of 65% or higher	2 placings at CDI/CDIO4*level (big tour or equivalent) with a score of 65% or higher	2 placings at CDI/CDIO3*level (big tour or equivalent) with a score of 65% or higher	2 placings at CDI2*level (big tour or equivalent) with a score of 65% or higher	2 placings at Prix St Georges or Intermediate I level with a score of 65% or higher
Stallion progeny - Showjumping	2 progeny each with 2 double clear rounds at CSI/CSIO 4* level in FEI competitions (GP or Nations' Cup class fence height at least 1.50m or equivalent[2]) or higher	2 progeny each with 2 double clear rounds at CSI/CSIO 3* level in FEI competitions or 2 double clear rounds in FEI competitions at a fence height of at least 1.45m at CSI/CSIO level or 2 top 4 placings in FEI speed classes at a fence height of at least 1. 50m at CSI/CSIO level or higher	2 progeny each with 2 double clear rounds at CSI/CSIO 2* level in FEI competitions or 2 double clear rounds in FEI competitions at a fence height of at least 1.40m at CSI/CSIO level or 2 top 4 placings in FEI speed classes at a fence height of at least 1.45m at CSI/CSIO level or 2 double clear rounds at National 1.50m level[3] or higher	2 progeny each with 2 double clear rounds at National 1.40m level or equivalent[4] or 2 top 4 placings in FEI speed classes at a fence height of at least 1.40m at CSI/CSIO level or higher	2 progeny each with 2 double clear rounds at National 1.30m level or equivalent[5] or higher
Stallion progeny – Eventing	2 progeny each with 2 MERs[15] at CCI 3* level[11] or higher	2 progeny each with 2 MERs[15] at CIC/CNC 3* level or higher	2 progeny each with 2 Top 25% finishes at CCI 2* level[12] or higher	2 progeny each with 2 Top 10% finishes at CIC/CNC 2* level or higher	2 progeny each with 2 Top 25% finishes at CCI 1* level[13]
Stallion progeny – Dressage	2 progeny each with 2 top placings at CDI/CDIO4*level (big tour or equivalent) with a score of 65% or higher	2 progeny each with 2 top placings at CDI/CDIO3*level (big tour or equivalent) with a score of 65% or higher	2 progeny each with 2 top placings at CDI2*level (big tour or equivalent) with a score of 65% or higher	2 progeny each with 2 top placings at Prix St Georges or Intermediate **I** level or higher	2 progeny each with 2 top placings at National Advanced level with a score of 65% or higher

[1] Equivalent includes a Top 4 placing at CSI/CSIO 5* Grand Prix or major championships. Also includes top 4 placings and double clear rounds at Olympic Games, World Championships and European Championships.
[2] Equivalent includes FEI competitions at a fence height of at least 1.50m run according to one of the following FEI articles: 238.2.2, 264 (Nations Cup), 273 (Competitions over two rounds), 274 (Competitions in two phases), 275 (Competitions in groups with a winning round), 276 (Competitions with winning round), 277 (Derby – only those with jump-off). FEI competitions include only those that are eligible for ranking points. For competitions taking place in 2010 and earlier, see the FEI "Rules for the Calculation of Points for the Rolex Rankings" on the FEI website. Competitions taking place from 2011 onwards, the set of rules for the calculation of points that is in place at the time of the competition will be used.
[3] Includes at all CSI/CSIO 1* and National affiliated classes with two rounds or one round and a jump-off at 1.50m or above
[4] Includes all National affiliated classes with two rounds or one round and a jump-off at or above 1.40m
[10] Includes Olympic Games and World Championships
[11] Includes European Championships
[12] Includes European Young Rider (U21) Championships
[13] Includes European Junior Rider (U18) Championships
[14] Includes FEI competitions run according to one of the following FEI articles: 238.2.1, 239, 263 (Hunting competitions or Speed and Handiness Competitions)
[15] MERs are the Minimum Eligibility Requirements as set out by the FEI. For 2010, MERs are set out in Article 506 of the FEI Rules for Eventing. In summary, a minimum eligibility requirement (MER) is achieved by completing a competition within minimum parameters of all round performance. As follows: Dressage Test:not more than 75 penalty points. Cross-Country Test: a clear round (0 penalties) at obstacles for CIC events and maximum 20 penalties at a CCI event and not more than 90 seconds exceeding the optimum time (120 seconds at 4* events). Jumping Test: not more than 16 penalties at obstacles.

PERFORMANCE POINTS IN NATIONAL COMPETITION IN IRELAND.

Performance information at national level for showjumping and eventing in Ireland for individual stallions and their progeny are included for each stallion where available. Such performance data was supplied by Showjumping Ireland and Eventing Ireland up to 31 December 2017 and included in respect of horses registered in the Irish Horse Register. For each horse, the highest level competed at in both disciplines has been included for the first time.

PERFORMANCE INFORMATION IN INTERNATIONAL COMPETITION

The highest level competed at and the highest fence height competed at is included In respect of horses registered in the Irish Horse Register, based on data sourced by Horse Sport Ireland from the FEI.

NOTE: Every effort has been made to ensure that all the data contained in this publication have been accurately collated. However, since the information has been collated from a number of sources it may be incomplete in some instances.
Horse Sport Ireland shall not be held responsible for any inaccuracies herein.
Horse Sport Ireland shall not be responsible for documenting the performance of horses which are not registered in the Irish Horse Register.
Horse Sport Ireland wishes to acknowledge the co-operation of the Fédération Equestre Internationale (FEI), Showjumping Ireland and Eventing Ireland.

Trademarks

Linear scoring was introduced in 2010 under the new Horse Sport Ireland inspection process for the Irish Sport Horse and Irish Draught Horse Studbooks. Linear scoring is a descriptive method of assessing a horse, describing where a horse lies between the biological extremes for any given trait. For example, the trait 'Stance of Forelegs' describes where a horse lies in relation to the two extremes for that trait, i.e. between obviously 'Back at Knee' and obviously 'Over at Knee'.

Trait		**Obvious**	**Average**	**Obvious**
		a b c	d e f	g h i
Stance of Forelegs	**Back at Knee**	[ ] [ ] [ ]	[ ] [ ] [ ]	[ ] [ ] [ ]

A horse that receives an 'a' for 'Stance of Forelegs' is being described by the inspection panel as being very obviously 'Back at Knee', while a horse that received a score of 'i' is being described as very obviously 'Over at Knee'. A horse that receives a score of 'e' is being described as average for 'Stance of Forelegs' (neither over or back at knee). Linear scoring is strictly about making observations on a horses traits and the average score is not always the most desirable. For example, the trait 'Scope' is assessed when the horse is jumped loose or under saddle. Horses are described in terms of where they lie between having 'Much' or 'Little' Scope. In this case scoring an 'a' for obviously 'Much Scope' is preferable to scoring an 'e' for 'Average Scope'.

Trait		**Obvious**	**Average**	**Obvious**	
		a b c	d e f	g h i	
Scope	**Much**	[ ] [ ] [ ]	[ ] [ ] [ ]	[ ] [ ] [ ]	**Little**

There are 37 different traits that are scored on the Irish Sport Horse linear score sheet. 19 of these are conformation traits (eg. Position of Shoulder, Stance of Forelegs, Stance of Hindlegs), 9 are movement traits (eg. Trot Length of Stride, Trot Balance) and 9 are athleticism traits (eg. Scope).

In this publication linear profiles are published for all stallions that underwent the Irish Sport Horse Studbook inspection process between 2010 and 2018 and were classified as APPROVED.

The Irish Sport Horse Studbook Genetic Evaluation Report 2018

Genetic evaluation

A horse's performance ability is due to a combination of its genetic merit and a range of environmental influences including its rider, training, feeding etc. For breeding purposes, only the horse's genetic merit is important as this is component that can be passed on to a foal.

What is a Genetic Evaluation?

Genetic evaluation is a scientific objective, statistical assessment of the genetic merit of horses. The results are published as Breeding Values (BVs) which are predictions of the genetic advantage that a horse will pass on to its offspring for a particular trait. A horse's breeding value measures the difference between its genetic ability and the average of the population. HSI carries out a genetic evaluation for showjumping horses in Ireland. Breeding Values for showjumping ability at international level are produced which measures the difference between each horse's genetic ability for international level showjumping and the average genetic ability for showjumping for the Irish population.

How are the Breeding Values calculated?

Three sources of information are used in the genetic evaluation: pedigree, own performance and progeny performance. Breeding values for young stallions are based mainly on their pedigree, as they start a competitive career the emphasis shifts to be on their own performance and finally shifts again to their progeny as they begin competing. Progeny information is the most reliable source of information in the genetic evaluation process.

Breeding values are calculated using information from a horse's own performance and from all of its relatives, including parents and progeny. Breeding values are published for stallions that have been classified or had progeny registered in the last three years and are classified as Approved (APP), Recognised (REC), Preliminary Approved, (PA), Supplementary Approved (SA), or Preliminary Recognised (PR) in the Irish Sport Horse Studbook. Breeding values for mares are available to owners, on request.

Breeding values reflect the average of a stallion's progeny. Although all foals inherit half of their genes for each parent, luck still determines whether they inherit a "good" half, a "bad" half or an "average" half.

Pedigree information measures the show jumping ability of all of a horse's known relatives including parents, full- and half-siblings, grandparents, uncles, aunts etc. The amount of emphasis placed on a relative's performance depends on how closely they are related. For example, breeding values of young stallions that have yet to compete are based solely on their pedigree. Their sire contributes 50% of their genes and therefore, 50% of their breeding value. Grandsires will contribute 25% of their genes, on average, and therefore 25% of their breeding value. Breeding values based on pedigree alone will be identical for all full siblings, however, when these horses start to compete, their own performances will be used to determine if they inherited a "good" set of genes or a "bad" set of genes and their breeding values will change accordingly. Breeding values based on pedigree alone are termed "pedigree indexes" in HSI publications to allow for their easy identification.

The inclusion of all recorded relatives in the genetic evaluation also ensures that stallion's breeding values have been adjusted to take into account the quality of the mares that he has been mated with. Breeding values based on progeny information tell us the degree to which a stallion has been a breed improver when crossed with Irish mares. Phenotypic measurements such as star ratings are affected by the number of high genetic merit mares that a stallion has covered, breeding values are not.

Own performance information is the second source of information used in the genetic evaluation and is combined with pedigree information to determine how much of the performance can be attributed to the horse's genes and how much is due to its environment, e.g. rider, training. Breeding values based on own performances tell us if a horse is living up to the potential indicated by its pedigree. The third source of information is progeny performance, the relative importance of pedigree and own performance decreases as more progeny are recorded in sport.

Measurement of show jumping ability

The breeding objective of the Irish Sport Horse (ISH) Studbook is "to produce a performance horse that is sound, athletic with good paces and suitable temperament and capable of winning at the highest international level in FEI disciplines". It is vital that the genetic evaluation reflects a horses' ability to produce progeny that can compete successfully at the highest levels and this requires direct measurement of international performance.

In 2009, Horse Sport Ireland published a new breeding policy for the ISH studbook which introduced the award of star ratings to horses that are successful as performance horses or as progenitors. The ratings enable breeders to quickly identify older stallions with a proven track record and younger stallions that are out-performing their contemporaries and are the potential stars of the future. Star ratings and merits for stallions, mares and geldings are periodically reviewed and are based on all verifiable performances without time or geography limits. Star ratings are based on the highest level in sport that a horse has achieved successfully (i.e. with at least two double clear rounds or a top four placing in single-round speed competitions).

Lifetime performance ratings are based on the star rating system and have been chosen as the measurement of performance for the genetic evaluation. This is based on comprehensive national level information from the SJI database and international results collated by HSI from the FEI and other sources.

This measure produces breeding values for stallions available to Irish breeders that take into account successful international level performances, reflect how well the stallions cross with Irish mares and can also provide breeding values for foreign based stallions based on their own performance. One difference between the genetic evaluation and the star ratings awarded to stallions is that the lifetime performance rating of all competing progeny of a stallion are included in the genetic evaluation, whereas star ratings are based on a stallion's best two progeny. Star ratings are a phenotypic measurement of performance reflecting the best of a stallion's progeny. Breeding values are a genetic measurement of the average improvement in performance of a stallion's progeny when compared to those of other stallions.

Lifetime performance ratings allow for the incorporation of international level performances is routine and timely fashion. They also allow for the incorporation of national level performances of the horses at national level in foreign countries and therefore can take into account the performances of horses that are exported at a young age. The methodology can be easily extended for use in other disciplines such as eventing when sufficient data is available and can be integrated with linear profiling information in the future.

Lifetime performance ratings are converted into a numeric score for each horse. This score reflects the percentage of Irish Sport Horses that compete successfully at this level and measure the difference between the horse and the average ISH show jumper in standard deviation units.

Table 1. Lifetime performance rating in the Irish Sport Horse Studbook

Lifetime Performance rating	Criteria	Equivalent stallion star rating	Equivalent mare/gelding star rating	Comparison with ISH showjumpers
FEI CSI Championship	Competed at major international championships	5*	5*	Top 0.2%
FEI CSI 5*	Two double clear rounds at FEI CSI 5* Grand Prix or Nations Cup level	5*	5*	Top 0.4%
FEI CSI 4*	Two double clear rounds at FEI CSI 4* Grand Prix or Nations Cup level	4*	5*	Top 0.6%
FEI CSI 3*	Two double clear rounds at FEI CSI 3* level	3*	4*	Top 1.5%
FEI CSI/National 1.50m	Two double clear rounds at FEI CSI or National 1.50m level	2*	3*/4*	Top 2.5%
National 1.40m	Two double clear rounds at National 1.40m level	1*	3*	Top 3.5%
National 1.30m	Two double clear rounds at National 1.30m level		3*	Top 12%
National 1.20m	Two double clear rounds at National 1.20m level		2*	Top 25%
National 1.10m	Two double clear rounds at National 1.10m level		1*	Above average
National 1.00m	Two double clear rounds at National 1.00m level			Average
Below national 1.00m	Has not achieved two double clear rounds at National 1.00m level			Below average

Breeding values

Breeding values are expressed as an index with an average value of 100. This baseline value of 100 reflects the average genetic merit of active breeding Irish Sport Horse mares born between 1994 and 2008 and enables comparisons between horses. Every year this baseline moves to include mares between four and eighteen years of age so that the baseline value of 100 reflects the progress being made within the breed. The spread of the breeding values is set to a standard deviation of 20. The spread of breeding values follows a normal distribution with approx. two-thirds of horses with breeding values between 80 and 120 and are considered average for the breed.

For example, horses with breeding values of over 120 are considered to be of high genetic merit and are breed improvers. Horses with breeding values over 130 considered to be superior breed improvers. It should be noted that a horse with a breeding value of 140 may not be substantially better than a horse with a breeding value of 138, both are of very high genetic merit.

The true genetic merit of a horse can never be known exactly. Although both a horse's own performance and its progeny provide information about its genetic merit, performances are affected by factors other than genetics and progeny share just half of their parents' genes. Breeding values are estimates of genetic merit and should always be considered taking into account their reliability. Breeding values change every year as more data becomes available, for example, as the number of a stallion's progeny competing increases. The reliability value reflects the amount and type of information used in the calculation of a breeding value and can range from 0 to 100%. More information on a

horse results in a higher reliability. Breeding values with a low reliability are likely to change, either upwards or downwards, as more information becomes available.

Breeding values with a reliability of 90% or greater are very reliable and are unlikely to change greatly. Breeding values with a reliability of over 50% have satisfactory reliability but those with a reliability between 30% and 50% should be considered to have a poor reliability. Breeding values with a reliability below 30% are not published. For example, all Irish Sport Horse stallions with showjumping breeding values with a reliability greater than 75% have at least 20 progeny included in the genetic evaluation.

In general, there is less information available on foreign and Thoroughbred stallions as very few have parents who have been genetically evaluated in Ireland. This leads to lower reliabilities for these horses. Horses with low amounts of information available receive breeding close to 100 as this is the average of the breed. Breeding values for foreign stallions may also be available from their studbook of origin (e.g. studbooks in the Netherlands, Germany, Belgium, Sweden, France). Although breeding values between countries are not directly comparable, they may be useful for stallions standing abroad without sufficient numbers of progeny recorded in Ireland.

For the first time, performances at national level in the UK and the USA have been included in the genetic evaluation for many horses, where possible. As the scope of the data included has changed since the 2015 stallion book, direct comparisons may not be appropriate for all stallions.

Why refer to Breeding Values when choosing a stallion?

Show jumping breeding values (BV-SJ) predict the showjumping ability of a stallion's offspring. For Irish Sport Horse stallions with BV-SJ greater than 130, over twenty times as many of their offspring will compete at international level compared to the offspring of stallions with BV-SJ less than 100. Foals by stallions with BV-SJ above 130 achieve, on average, €445 more at auction than foals by stallions with BV-SJ below 100.

For publication, breeding values are divided into a number of tables:

- Table 1. Stallions that have at least 5 Irish Sport Horse progeny that are at least 10 years of age. These stallions have had the opportunity to produce international level progeny. Their BVs are based mainly on their progeny's performance.
- Table 2. Stallions that have at least 5 Irish Sport Horse progeny that are at least 4 years of age. These stallions have progeny competing at national level but their progeny have not yet had the opportunity to compete internationally. The BVs for these stallions are based on a combination of progeny, own performance and pedigree information.
- Table 3. Stallions that do not have sufficient competing Irish Sport Horse progeny and are evaluated on the basis of their own performance. The BVs for these stallions are based on a combination of their own performance and pedigree. This group includes many recently classified stallions including young stallions that have been recently inspected.

TABLE 1: HSI Listed Stallions that have at least 5 Irish Sport Horse progeny that are at least 10 years of age
