### ISH STALLION ASSESSMENT PROCESS

- ◆ **STAGE 1:** Stallions must be a minimum of 3 years of age to be presented for the Stage 1 inspection. Stallions undergo a veterinary examination (including X-Rays) and an assessment of their conformation, movement and athleticism using linear scoring. Movement is assessed both in hand and loose and athleticism is assessed by means of loose jumping. Older stallions can opt to have their athleticism assessed under saddle. Stallions that meet the inspection and veterinary requirements are invited to participate in the Stage 2 inspections.
- ◆ **STAGE 2:** Stallions must be a minimum of 4 years of age to be presented for the Stage 2 inspection which is a ridden assessment. Stallions are required to complete a course of up to 8 fences ridden by their own rider and by a test rider appointed by HSI. Each stallion undergoes a further veterinary examination and an assessment of their gaits and athleticism under saddle. Stallions that meet the veterinary and inspection requirements in the Stage 2 inspections are classified as 'Preliminary Approved (PA)' and proceed to Stage 3.
- ◆ **STAGE 3:** 'Preliminary Approved (PA)' stallions aged between 4 and 12 years of age undergo Stage 3 of the assessment process which involves a review of the stallion's own performance and/or his progeny's performance. This review takes place annually between the ages of 6 and 12 years and stallions that are deemed to have sufficient performance/progeny performance are upgraded to 'Approved'. Stallions with insufficient performance/progeny performance by the age of 12 years can be re-classified as 'Not Approved 1 (NA1)'.

## LINEAR PROFILING

Linear scoring was introduced in 2010 under the new Horse Sport Ireland inspection process for the Irish Sport Horse and Irish Draught Horse Studbooks. Linear scoring is a descriptive method of assessing a horse, describing where a horse lies between the biological extremes for any given trait. For example, the trait 'Stance of Forelegs' describes where a horse lies in relation to the two extremes for that trait, i.e. between obviously 'Back at Knee' and obviously 'Over at Knee'.

Trait		Obvious	Average	Obvious
		a b c	d e f	g h i
Stance of Forelegs	Back at Knee	[ ] [ ] [ ]	[ ] [ ] [ ]	[ ] [ ] [ ]

A horse that receives an 'a' for 'Stance of Forelegs' is being described by the inspection panel as being very obviously 'Back at Knee', while a horse that received a score of 'i' is being described as very obviously 'Over at Knee'. A horse that receives a score of 'e' is being described as average for 'Stance of Forelegs' (neither over or back at knee).

Linear scoring is strictly about making observations on a horse's traits and the average score is not always the most desirable. For example, the trait 'Scope' is assessed when the horse is jumped loose or under saddle. Horses are described in terms of where they lie between having 'Much' or 'Little' Scope. In this case scoring an 'a' for obviously 'Much Scope' is preferable to scoring an 'e' for 'Average Scope'.

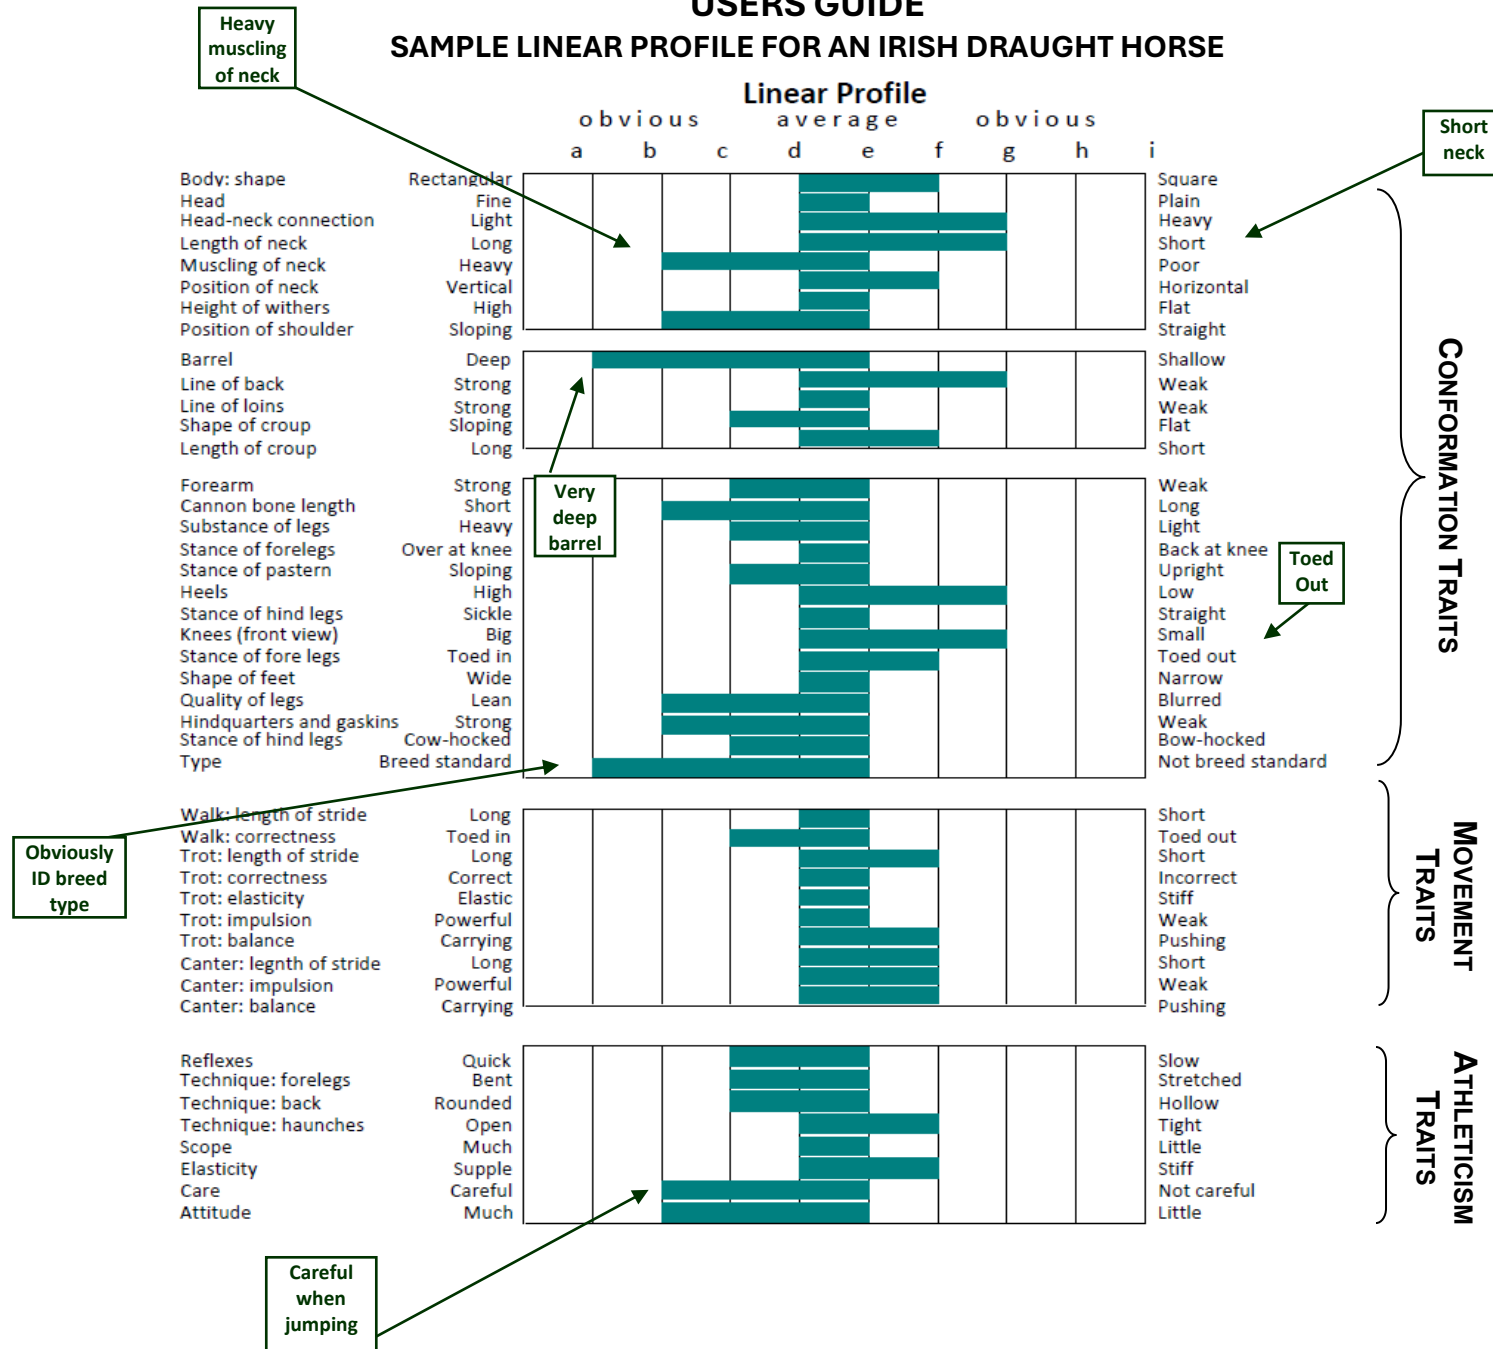

Trait		Obvious	Average	Obvious	
		a b c	d e f	g h i	
Scope	Much	[ ] [ ] [ ]	[ ] [ ] [ ]	[ ] [ ] [ ]	Little

There are 37 different traits that are scored on the Irish Sport Horse linear score sheet. 19 of these are conformation traits (eg. Position of Shoulder, Stance of Forelegs, Stance of Hindlegs), 9 are movement traits (eg. Trot Length of Stride, Trot Balance) and 9 are athleticism traits (eg. Scope).

In this publication linear profiles are published for all stallions that underwent the Irish Sport Horse Studbook inspection process between 2010 and 2019 and were classified as APPROVED.
