INTRODUCTION

This book contains the Horse Sport Ireland Carriage Driving Section rules for Horse Driving Trials effective from 1 January 2025. As from this date, all other texts covering the same matter issued previously are superseded. Carriage Driving Ireland is a Horse Sport Ireland affiliated Club Section and operates under their supervision. Matters not covered in this book must be dealt with by Horse Sport Ireland regulations. If an incident occurs that is not covered by a specific rule the President of the Jury and Technical Delegate will determine any penalty that may be necessary. Any incident will be considered in 'The Spirit of the Sport'. They will report the specific incident to Horse Sport Ireland office in their post event report for consideration by the Rules Committee. Carriage Driving Ireland is committed to genuine equality of opportunity. This means that we treat all members irrespective of ethnic, origin, sex, marital status, sexual orientation, age, religion or disability. Throughout this publication the word 'horse' shall mean horse and/or pony.

A forward, active regular trot, with the Horse on the bit, carrying himself in balance and rhythm with even, elastic steps, good hock action and clear impulsion. The steps of the hind feet must at least be touching the ground in the footprints of the fore feet.

1.2.6. Collected Trot

The Horse remains on the bit and moves energetically forward with a greater degree of engagement, leading to an increased flexion of the hocks and fetlock joints and raising up with the forehand, thus allowing for more mobility and elevation of the strides. The neck will be raised and more arched, with the poll the highest part. The nose should not be behind the vertical, or the neck restricted. The hind legs should take more weight and cadence should be visible.

1.2.7. Extended Trot

The Horse lengthens its stride to cover as much ground as possible resulting from greater impulsion from the hindquarters. The Athlete allows the Horse, remaining “on the bit” without leaning on it, to lengthen its frame to gain ground, with the nose slightly in front of the vertical. The hind feet must clearly over track the footprints made by the fore feet.

The Horse must remain in balance while maintaining the same rhythm with strides of equal size. Hurried strides are discouraged, and result in severe faults.

1.2.8. Medium Trot

A pace between the defined Working Trot and Extended Trot. The Horse lengthens his stride to cover less ground than asked for in the Extended Trot but more ground than asked for in the Working Trot as a result of greater impulsion coming from the hindquarters. The Athlete allows the Horse, remaining ‘on the bit’ without leaning on it, to lengthen the frame to gain ground, with the nose slightly in front of the vertical.

The hind feet should overtrack the footprints made by the fore feet. The Horse must remain in balance while maintaining the same rhythm with strides of equal size. Hurried strides are not encouraged and result in severe faults.

1.2.9. Working Canter

A forward, active pace with regular strides of a three beat time. The Horse, showing good balance, remains on the bit without leaning on the hand, and going forward with light cadenced strides and good hock action.

A Canter to the right, for instance, will have the footfalls follow one another in the following sequence: left hind, left diagonal (simultaneously left fore and right hind), right fore, followed by a moment of suspension with all four feet off the ground before the next stride begins.

The quality of the Canter is judged by the general impression, and the regularity and lightness of the three-beat pace in a clear uphill tendency. The Horse must be on the bit, well engaged in the hindquarters with good hock action, and must have the ability to maintain its rhythm and natural balance throughout the movement and the transition. The Horse must remain straight on straight lines and correctly bent on curved lines.

1.2.10. Collected Canter

The Horses strides are shorter than in working canter with the hocks maintain a clear impulsion and the hind legs take more weight; the point of gravity is moving backwards and the neck and poll increasingly coming up with the nose slightly in front of the vertical demonstrating a clear uphill tendency and self-carriage. The basic pace is clearly three beats with a light steady contact that demonstrates the Horses suppleness and elasticity.

1.2.11. Extended Canter

In the extended canter, the Horse covers as much ground as possible with obviously lengthened strides and frame; no hurried strides, the nose always in front of the vertical, and maintaining balance and uphill tendency. There should be clear transitions into and out of the extended canter.

1.2.12. Simple change of leg at the canter

This is a movement in which, after a direct transition out of the canter the Horse changes movement into a trot with three (3) to five (5) clearly defined steps followed immediately by a transition to the other canter lead.

1.2.13. Reinback

The Horse must walk backwards in a straight line, with the legs being lifted and set down in diagonal pairs. The Horse must remain on the bit, be straight in the body, not evade or resist the contact, and the poll should remain the highest point. Transition to the next movement must be immediate and smooth.

1.2.14. Shoulder-In

For Four-In-Hand:

Shoulder-In for the Driven Horse is performed in Collected Trot. The leaders are positioned so that the outside leader's tail is in front of the head of the pole. The leaders' shoulders are taken to the inside with a constant angle of approximately 30 degrees and a slight but consistent bend in the neck. The inside hind leg strides

forward into the line of the outside front leg so that the Horses are working on three tracks. Impulsion, rhythm and engagement must be maintained throughout. Too much bend in the neck results in loss of rhythm and suppleness. The wheelers must remain straight with no counter bend.

For Single:

The Shoulder-In is performed in Collected trot. The Horse is driven with a slight but uniform bend maintaining engagement, cadence, and a constant angle of approx. thirty (30) degrees. The Horse's inside foreleg passes and crosses in front of the outside foreleg and the inside hind leg steps forward under the Horse's body weight following the same track of the outside foreleg with the lowering of the inside hip. The Horse is bent away from the direction in which it is moving.

1.2.15. Diagonal Yield

The Horse is nearly parallel to the Center line and crossing its legs diagonally, the hind direction on a diagonal and front together, and a slight flexion to the inside.

1.2.16. Stretching the frame

Athletes lengthen the reins gradually to the Horse(s) using a guided hand, to encourage and enable the Horse's neck to stretch forwards and downwards. As the neck stretches forwards and downwards, the Horse's mouth should reach the horizontal line corresponding with, but not lower than, the top point of the shoulder. An elastic and consistent contact with the Athlete's hands must be maintained and at no point should slack or loose rein be visible during the exercise. The same rhythm and impulsion will be maintained and the Horse should remain light in the shoulders with the hind legs well-engaged. As soon as stretching of the frame has been demonstrated, the Athlete will bring the Horse(s) back to the preceding head carriage by retaking the reins during which the Horse must accept the contact without resistance in the mouth or poll.

1.2.17. Transitions

Changes of pace must always be made smoothly and promptly with the Horse remaining in balance and on the bit. A transition must be completed as the nose of the Horse arrives at the prescribed marker, unless otherwise stated.

1.2.18. Change of Pace and Movement

Changes of pace and movement are made when the heads of the leaders reach the prescribed marker as indicated in the test.

1.3. Terminology

The following must be considered when judging Driven Dressage movements:

1.3.1. Obedience and Lightness

A willing response to aids without resistance and correctness of bend.

1.3.2. Regularity

The regularity, evenness and rhythm with which the Horse puts his feet to the ground.

1.3.3. Contact

The connection through the reins between the Athlete's hands and the Horse's mouth. It should be soft and steady at all times.

1.3.4. Impulsion

The willingness of the Horse to go forward energetically at all times and to respond quickly and evenly to changes of pace. The Horse must remain in balance while maintaining the same tempo with strides of equal size.

1.3.5. Straightness

Carrying the head, neck and body in a straight line with the weight evenly divided among the legs. On curved lines the hind legs need to follow the footprints of the fore feet without escaping or swinging out.

1.3.6. Collection

Roundness and engagement with good hock action, elevated poll allowing the shoulders to move with ease. The Horse's energy is contained in a more deliberate pace than the Working Trot. The haunches are more compressed, the croup is lowered and the forehead elevated to the same degree. The stride is shorter and more powerful than the Working Trot but the front legs move from the shoulder with greater agility resulting in lightness and greater mobility throughout. The neck should be more arched. The shortening of the frame is not and never should be a result of pulling back but rather of asking and allowing the Horse to move forward into the Athlete's hand.

1.3.7. Accuracy

Correctness; roundness; and accurately sized figures, and corners as indicated in the Test.

1.4. General Impression

1.4.1. Principle

There are two boxes at the end of the Judges Score Sheets for marks on: Athlete and General Impression & Presentation observed by the judges throughout the whole test.

1.4.2. Athlete

4.2.1. Use of aids, handling of reins and whip, position on the box, accuracy of figures.

The mark must reflect the consistent level of accuracy and quality of transitions.

4.2.2. Para Driving Athletes in able-bodies competitions Athletes may salute with a nod of their head only. Hats must not be removed at the salute so that the contact must be maintained on the reins during the halt and salute.

4.2.3. Para Driving Athletes are allowed to do one handed movements with two hands, when mentioned in the Classification Master List of active Para Driving Athletes following the classification of the Athlete. The maximal points attributed to the Athlete shall be 4, if the movement is correctly executed.

1.4.3. General impression & Presentation

Appearance of driver Athlete and grooms, correctness, cleanliness harmonizing with harness and carriage. Fitness, matching and condition of Horse(s), balanced picture of the complete turnout. Clearance and fit of harness. Harmony between Horse(s) and Athlete.

1.5. Scoring

1.5.1. Marks

Marks out of 10 will be awarded for each numbered movement and for each heading under General Impression on the following basis:

- **10:** Excellent
- **9.0:** Very Good
- **8.0:** Good
- **7.0:** Fairly Good
- **6.0:** Satisfactory
- **5.0:** Sufficient
- **4.0:** Insufficient
- **3.0:** Fairly Bad
- **2.0:** Bad
- **1.0:** Very Bad
- **0:** Not Executed

Half marks may be awarded.

1.5.2. Error of Test

If an Athlete attempts to perform a movement, or attempts to maintain the pace required, and fails to do so, but does not deviate from the track, the President of the Ground Jury may either treat it as an “Error of Course” (see below) or may decide to leave the Judges to give the movement an appropriate mark. If an Athlete makes no effort to perform a movement in a Test then it may either be treated as an Error of Test or as an Error of Course at the discretion of the President of the Jury.

1.5.3. Error of Course

An “Error of Course” is when an Athlete deviates from the required track or when a movement is performed at the wrong pace or omitted altogether.

In the event of an Athlete making an Error of Course, the President of the Ground Jury will ring the bell and stop the Athlete. The Athlete must then resume the Test from the beginning of the movement where the error was made. If the Athlete is in any doubt, the Athlete may ask the President of the Ground Jury for guidance, without incurring any penalties.

1.5.4. Disconnected or Broken Harness

If the reins, pole strap, chains or trace become disconnected or broken, or should the Horse get a leg over the pole, trace or shaft, the President of the Ground Jury must ring the bell, and a Groom(s) must dismount and re-connect or repair as appropriate. The Athlete will be penalised for a Groom(s) dismounting.

1.5.5. Disobedience

Any resistance in the forward movement, kicking or rearing is considered to be disobedience and will be penalised by the Judge at C, as follows: 1st Incident 5 penalties, 2nd Incident 10 penalties, 3rd Incident Elimination

1.5.6. Carriage overturn

A Carriage overturning is elimination.

1.6. Classification

1.6.1. Total Marks

- 1.6.1.1. The individual marks awarded by each Judge for each movement and for General Impression will be added together and divided by the number of Judges to obtain the average score.
- 1.6.1.2. In case a “live scoring system” is used during the Dressage competition, it must only publish the evolution of the percentage during the dressage test and not the marks by judges.
- 1.6.1.3. In order to adjust the influence of Driven Dressage on the whole Event, where the total possible marks for the Test are greater than 160, the average score will be multiplied by the coefficient printed on the score sheet to obtain the adjusted average score to be used in the results.
- 1.6.1.4. Penalties are only awarded by the President of the Ground Jury at C. Any penalties will be deducted from the adjusted average score and the final total will be deducted from 160 to obtain the penalties for the Test.
- 1.6.2.** Scores will be calculated to two decimal places.
- 1.6.3.** The Athlete with the lowest score in penalties will be the winner of Driven Dressage

The Driver and all Grooms must be on the carriage as it crosses the Start and Finish Line and passes through the compulsory turning flags in each Section (Section A, Controlled Warm-Up and Section B). Failure to do so incurs 5 penalty points for Grooms and 20 penalty points for the Driver on each occasion.
- 2.4.4. In exceptional circumstances, if warranted due to the condition of the terrain or weather, the Technical Delegate and the President of the Ground Jury may permit Grooms in Competitions for Ponies and Single Horses to run behind their carriage on designated parts of the Course.

Also, the Driver must stop when instructed to make necessary repairs by a member of the Ground Jury or Obstacle observer. - An Oxer will be composed of two pairs of cones in a straight line. The distance between the first set of cones and the second set will be between 1.5 and 3 metres, at the discretion of the Course Designer. The Oxer counts as a single obstacle and the maximum penalty points for knocking down up to 4 balls is 3 penalty points in total. Rules for Young Drivers

Introduction

Competitive Carriage driving in Ireland was established in the 1970s. At the time it was much more complex than nowadays. Now we have three phase horse driving trials in 3 days or 2 days events including driven dressage in a marked 80 meter by 40 meter arena, cross country driving in an open field with hazards and obstacle driving driven through between a number of cones. Also have indoor driving trials usually one day with or without dressage, driving between cones and obstacles in an enclosed arena. There are different types of turnouts, single (1 equine), pair or tandem (2 equines) and team (4 equines). Also different categories to compete, Crystal, VSE (Very Small Equine), SE (Small Equine), Pre-Novice, Novice, Open and Advanced. Single and multiple turnouts do not compete against each other.
